

Prepare for Success walkthrough

Narrator: *This short flash demonstration will show you how to use some of the features of the learning materials in Prepare for Success.*

Here is a typical learning activity from Prepare for Success. It's a listening activity that will help you find out about exams in the UK. There is always an instruction, which tells you exactly what you have to do in the activity.

Below the instruction, there is a help button. For this listening activity, you can also see an audio player and the activity itself, which can be done while you listen or after listening.

If you need help, you can open this by clicking on the 'show help' button. You can find technical explanation to help you do the activity, an example, or other kinds of help here.

You can start the audio player when you are ready. You can pause it, move forward or move backwards at any time. You can listen to an audio, or watch a video, as many times as you need to while doing the activity.

In this activity you can move the items by using your mouse to click on them. They can then be dragged and dropped into the right box.

When you have finished listening and doing the activity, you can check your answers.

By opening the feedback, which follows, you can see more explanation, as well as some of the activity answers.

Notice that with the audios and videos there is also a transcript. You can open this and use it to check your understanding at the end of an activity.

Finally, don't forget the review section. This summarises the main points that you should have learned from doing the activity. Sometimes there are also useful web links here, which give you more information or practice.
